

Interactive Neuromuscular Stimulation

Optimizing the Human Condition

RELAX AND LENGTHEN
TIGHT MUSCLES

ACTIVATE MUSCLES
FOR STRENGTH AND STABILITY

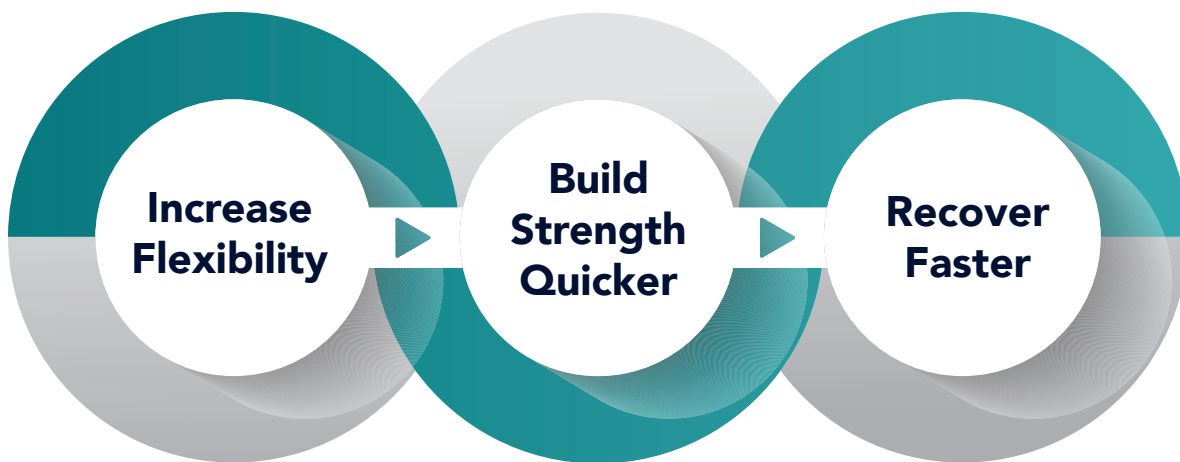

IMPROVE
OVERALL MOVEMENT

Interactive Neuromuscular Stimulation (INS) is an advanced technology that is a comfortable yet powerful electrical stimulus, created by NeuX Technologies. Combining two unique waveforms that are applied transcutaneously to the neuromuscular system, INS successfully addresses issues with muscles and the nervous system.

The NXPro is driven by INS, is FDA approved and can help:

The NXPro is also used for Dynamic Warm-Ups and Active Recovery

“We see all types of injuries - some that need ROM improvements and some that need strength improvements. With the adjustable frequencies of NXPro we can be efficient with our treatment plan. Patients love the use of the NXPro for strength benefits because it is not painful and at the same time helps improve flexibility.”
